THE

AMERICAN

JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND E. S. DANA, AND B. SILLIMAN.

ASSOCIATE EDITORS

PROFESSORS ASA GRAY, JOSIAH P. COOKE, AND JOHN TROWBRIDGE, OF CAMBRIDGE,

PROFESSORS H. A. NEWTON AND A. E. VERRILL, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XXII.—[WHOLE NUMBER, CXXII.]

Nos. 127—132.

JULY TO DECEMBER, 1881.

WITH SIX PLATES.

NEW HAVEN, CONN.: J. D. & E. S. DANA.

1881.

R v. 122 July - Dec. 1881

TUTTLE, MOREHOUSE & TAYLOR, PRINTERS,
NEW HAVEN, CONN.

CONTENTS OF VOLUME XXII.

NUMBER CXXVII.

Page

ART. I.—Contributions to Meteorology; by ELIAS LOOMIS. With Plate I, ... 1

II.—Coal Dust as an element of danger in Mining; by H. C. HOVEY, ... 18

III.—Notes on Mineral Localities in North Carolina; by W. E. HIDDEN, ... 21

IV.—Variation in Length of a Zinc Bar at the same Temperature; by C. B. COMSTOCK, ... 26

V.—Restoration of *Dinoceras mirabile;* by O. C. MARSH. With Plate II, ... 31

VI.—Torbanite or "Kerosene Shale" of New South Wales; by A. LIVERSIDGE, ... 32

VII.—Meteorological Researches, Part II. Cyclones, Tornadoes and Waterspouts; by W. FERREL, ... 33

VIII.—Magnetic Observations made in Davis Strait, in August and September, 1880; by O. T. SHERMAN, ... 49

IX.—Crystalline form of Sipylite; by J. W. MALLET, ... 52

X.—Observations on the Structure of Dictyophyton and its affinities with certain Sponges; by R. P. WHITFIELD, ... 53

XI.—Carboniferous Rocks of Southeast Kansas; by G. C. BROADHEAD, ... 55

XII.—Later Tertiary of the Gulf of Mexico; by E. W. HILGARD. With a map (Plate III), ... 58

XIII.—Dufrenite from Rockbridge County, Va.; by J. L. CAMPBELL, ... 65

XIV.—Turquois of New Mexico; by B. SILLIMAN, ... 67

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Free Fluorine in Fluor Spar, LOEW: Arsenobenzene, MICHAELIS and SCHULTZE, 71.—Transformation of Dextrose into Dextrine, MUSCULUS and MEYER, 72.—Pentathionic Acid, LEWES: Photographics, E L. WILSON, 73.—Conservation of Electricity, M. G. LIPPMANN: Inverse Electromotive force of the Voltaic arc, 74.—Stellar Photography, H. DRAPER: Weather Warnings, B. STEWART: Storing of Electricity, M. FAURE, 75.

Geology and Natural History.—Geology of British Columbia, G. M. DAWSON, 75.—Caribbean Miocene fossils: Geological Survey of New Jersey for 1880, 77.—Geological Survey of Pennsylvania: Geology of the Oil Regions of Warren, Venango, Clarion and Butler Counties, Pa., by J. F. CARLL: Statistics and Geology of Indiana for 1880: Illustrations of the Earth's Surface, N. S. SHALER and W. M. DAVIS, 78.—The Trilobite, C. D. WALCOTT, 79.—Geological Survey of Alabama, E. A. SMITH: Felsites and their associated rocks north of Boston, J. S. DILLER: Mémoire sur les Phénomènes d'Altération des Dépots superficiels, E. VAN DEN BROECK: Application of a solution of mercuric potassium iodide in mineralogical and lithological investigations, V. GOLDSCHMIDT, 80.—Deer horns impregnated with tin ore, J. H. COLLINS, 81.—Microlite from Amelia County, Virginia: Mya arenaria: Rhizopods, the food of some young fishes, 82.

Astronomy.—Figures of the planets, 82.—Observations of the Transit of Venus, S. NEWCOMB: Observations of Double Stars made at the U. S. Naval Observatory, A. HALL, 84.

Miscellaneous Scientific Intelligence.—Historical Sketch of the Boston Society of Natural History, T. T. BOUVÉ, 85.—American Association at Cincinnati: On the so-called Cosmical Dust, LASAULX, 86.

NUMBER CXXVIII.

Page

ART. XV.—Modification of Wheatstone's Microphone and its applicability to Radiophonic Researches; by A. G. BELL, 87

XVI.—Method of obtaining and measuring very high Vacua with a modified form of Sprengel-pump; by O. N. ROOD, 90

XIX.—Geological Relations of the Limestone Belts of Westchester County, New York: Origin of the Rocks of the Cortlandt Series; by J. D. DANA, ... 103

XX.—New Meteoric Iron, of unknown locality, in the Smithsonian Museum; by C. U. SHEPARD, ... 119

XXI.—The relative motion of the Earth and of the Luminiferous Ether; by A. A. MICHELSON, ... 120

XXII.—Observations on the Light of Telescopes used as Night-Glasses; by EDWARD S. HOLDEN, ... 129

XXIII.—Nature of Dictyophyton; by R. P. WHITFIELD, ... 132

XXIV.—Photographs of the Spectrum of the Comet of June, 1881; by HENRY DRAPER, ... 134

XXV.—Spectroscopic Observations upon the Comet *b*, 1881; by C. A. YOUNG, ... 135

XXVI.—Observations of Comet *b*, 1881, made at the United States Naval Observatory; by WM. HARKNESS, ... 137

XXVII.—Observations on the Comet 1881 *b;* by LEWIS BOSS, 140

XXVIII.—Polarization of Light from Comet *b*, 1881; by A. W. WRIGHT, ... 142

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Ozone as a cause of the Luminosity of Phosphorus, CHAPPUIS: Appearance of Nitrous Acid during the Evaporation of Water, WARINGTON, 145.—Boron hydride, JONES and TAYLOR: Purification of Carbon Disulphide, ALLARY: Electric Absorption of Crystals, H. A. ROWLAND and E. H. NICHOLS, 147.—Transmission of radiation of low refrangibility through Ebonite, ABNEY and FESTING: Conservation of Electricity, LIPPMANN: Heating of Ice, WÜLLNER: Atomic weight of Cadmium, HUNTINGTON, 148.

Geology and Mineralogy.—Terraces and Ancient Coast lines ("Strandlinien"), KARL PETTERSEN, 149.—Substances obtained from some "Forts vitrifiés" in France, M. DAUBRÉE, 150.—Pre-glacial Outlet of the Basin of Lake Erie, J. W. SPENCER, 151.—Laccoliths (or Laccolites) in Japan, G. H. KINAHAN: Iron Ore of Iron Mine Hill, Cumberland, R. I.: Brazos Coal-field, Texas: Report of the Geological Survey of Pennsylvania, F. PLATT and J. P. WETHERELL, 152.—Land-plants in the Middle Silurian of North Wales, H. HICKS: Vertebrata of the Permian Formation of Texas, E. D. COPE: Life-History of Spirifer lævis, H. S. WILLIAMS: Geological Society of London: Optical Characters and Crystalline System of some important Minerals, 153.—Notices of new minerals, 255.—Dawsonite from Tuscany: Vanadium Minerals from Cordoba: Zinn, eine geologisch-montanistisch-historische Monografie, E. REYER, 157.

Botany and Zoology.—Marine Algæ of New England, W. G. FARLOW, 158.—Das System der Medusen von E. Hæckel, 160.—Reptiles and Fishes in the Museum of Comp. Zoology, S. GARMAN: Dredging along the Atlantic Coast of U S. by Steamer Blake, 162.—Perissodactyles, with note on Toxodon, E. D. COPE, 163.

Astronomy.—Photographic Spectrum of Comet 1881, *b*, W. HUGGINS: Notice of the Comet, C. E. BURTON, 163.—Observations on the Comet, W. H. M. CHRISTIE, 164.

Miscellaneous Scientific Intelligence.—International Polar Stations occupied by the Signal Service, 164.—Smithsonian Institution: Endowment of the American Chemical Society, 165.—J. Lawrence Smith's Collection of Minerals and Meteorites, 166. *Obituary*—Achille Delesse: Deville, 166.

NUMBER CXXIX.

Page

ART. XXIX.—Benjamin Peirce, ... 167

XXX.—Emerald-green Spodumene from Alexander County, North Carolina; by E. S. DANA, ... 179

XXXI.—Objects and Interpretation of Soil Analyses; by E. W. HILGARD, ... 183

XXXII.—Mineralogical Notes; by B. SILLIMAN, ... 198

XXXIII.—Liquefaction and Cold produced by the mutual reaction of Solid Substances; by EVELYN M. WALTON, 206

XXXIV.—Spectrum of Arsenic; by OLIVER W. HUNTINGTON. With Plate IV, ... 214

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Spontaneous Oxidation of Mercury and other Metals, BERTHELOT, 217.—Hesperidin, a Glucoside of the Aurantiaceæ, TIEMANN and WILL, 218.—New series of Volatile Organic Bases, MEYER and TREADWELL: Photometry of the Fraunhofer lines, VIERORDT: Intensity of Sound, OVERBECK, 219.—Reversal of the lines of Metallic Vapors, LIVEING and DEWAR: Change of State, POYNTING, 220.

Geology and Mineralogy.—Geology of the Province of Minas Geraes, 221.—Progress of the Eruption on Hawaii, 226.—Glacial drift on Mt. Ktaadn, Maine, C. E. HAMLIN, 229.—Doleryte (trap) of the Triassico-Jurassic area of Eastern North America, G. W. HAWES, 230.—New Devonian Plants, J. W. DAWSON: Fossil Plants from the Lignite Tertiary Formation, at Roches Percées, Souris River, Manitoba, J. W. DAWSON, 233.—North American Mesozoic and Cænozoic Geology and Palæontology, S. A. MILLER: Species of Pterygotus from the Water-lime group near Buffalo, J. POHLMAN, 234.—Genus Alveolites, Amplexus and Zaphrentis, from the Carboniferous System of Scotland, J. THOMSON: Memoir upon Loxolophodon and Uintatherium, H. F. OSBORN: Vanadinite in Arizona, W. P. BLAKE, 235.

Botany and Zoology.—Monographiæ Phænogamarum, DECANDOLLE, 235.—Arboretum Segrezianum, A. LAVALLÉE, 238.—British Moss-Flora, R. BRAITHWAITE: Butterflies, their Structure, Changes and Life-histories, S. H. SCUDDER, 239.

Miscellaneous Scientific Intelligence.—Meeting of the American Association for the Advancement of Science, at Cincinnati, Ohio, 240.—Science Observer and a cipher-code for Astronomical telegraphic messages, 244.—A Dictionary of the Exact Sciences, Biographical and Literary, J. C. POGGENDORFF: Report of the Cotton Production of the State of Louisiana, E. W. HILGARD, 245.—Third Bressa Prize, Academy of Turin, open to Scientists and Inventors of all Nations, 246.

NUMBER CXXX.

Page

ART. XXXV.—Cause of the Arid Climate of the Western portion of the United States; by C. E. DUTTON, ... 247

XXXVI.—Embryonic Forms of Trilobites from the Primordial Rocks of Troy, N. Y.; by S. W. FORD, ... 250

XXXVII.—Observations of Comet *b*, 1881; by E. S. HOLDEN, 260

XXXVIII.—Thickness of the Ice-sheet at any Latitude; by W. J. McGEE, ... 264

XXXIX.—Address of Sir John Lubbock, ... 268

XL.—Notes on Earthquakes; by C. G. ROCKWOOD, ... 289

XLI.—Marine Fauna occupying the outer banks off the Southern coast of New England; by A. E. VERRILL, ... 292

XLII.—Note on the Tail of Comet *b*, 1881; by LEWIS BOSS. With Plates V and VI, ... 303

XLIII, XLIV.—Geological Relations of the Limestone Belts of Westchester Co., New York; by JAMES D. DANA, 313, 327

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Velocity of Light, RALEIGH: Movement of Sound Waves in Organ Pipes, R. KŒNIG: Conductivity of Metals for Heat and Electricity, LORENZ, 316.—Microphonic action of Selenium cells, J. MOSER: Stresses caused in the Interior of the Earth by the Weight of Continents and Mountains, G. H. DARWIN, 317.—Expansion of Cast Iron while solidifying, M. J. B. HANNAY and R. ANDERSON, 320.

Geology and Natural History.—Origin of the Iron Ores of the Marquette District, Lake Superior, M. E. WADSWORTH, 320.—Taconic rocks of the border of Lake Champlain, J. MARCOU, 321.—Volcanic Eruption on Hawaii: Glacier Scratches in Goshen in Northwestern Connecticut: Structure and Affinities of the Genus Monticulipora and its Subgenera, H. A. NICHOLSON, 322.—Ulexite in California, W. P. BLAKE: Worked Shells in New England Shell-Heaps, E. S. MORSE: Changes in Mya and Lunatia since the deposition of the New England Shell-Heaps, E. S. MORSE, 323.—Beiträge zur Morphologie und Physiologie der Pilze, Vierte Reihe, A. DEBARY and M. WORONIN, 324.—Fauna und Flora des Golfes von Neapel, SOLMS-LAUBACH, 325.—Botanical Collector's Handbook, W. W. BAILEY, 326.

Miscellaneous Scientific Intelligence.—Ancient Japanese Bronze Bells, E. S. MORSE, 326.

NUMBER CXXXI.

Page

ART. XLV.—Jurassic Birds and their Allies; by O. C. MARSH 337

XLVI.—The remarkable Aurora of September 12–13, 1881; by J. M. SCHAEBERLE 341

XLVII.—Address of Sir John Lubbock 343

XLVII *bis*.—The Stereoscope, and Vision by Optic Divergence; by W. LECONTE STEVENS 358

XLVIII.—The Electrical Resistance and the Coefficient of Expansion of Incandescent Platinum; by E. L. NICHOLS 363

XLIX.—Local Subsidence produced by an Ice-sheet; by W. J. MCGEE 368

L.—Note on the Laramie Group of Southern New Mexico; by J. J. STEVENSON 370

LI.—Polariscopic Observations of Comet *c*, 1881; by A. W. WRIGHT 372

LII.—The Relative Accuracy of different methods of determining the Solar Parallax; by W. HARKNESS 375

LIII.—The Nature of Cyathophycus; by C. D. WALCOTT 394

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—International Congress of Electricians, 395.—Elasticity and Motion, W. THOMSON: Efficiency of Spectroscopes, LIPPICH, 396.—Niagara Falls as a source of Energy, W. THOMSON: Change of plane of polarization of Heat rays by Electro-magnetism, L. GRUNMACH, 397.—Electro-dynamic Balance, H. HELMHOLTZ: Change of thermo-electric condition of iron and steel by magnetization, V. STROUHAL and C. BARUS: Principles of Chemical Philosophy, J. P. COOKE: A Manual of Sugar Analysis, J. H. TUCKER, 398.

Geology and Mineralogy.—Geology and Resources of the Black Hills of Dakota, H. NEWTON and W. P. JENNEY, 399.—Primitive Industry, or Illustrations of the Handiwork in stone, bone and clay of the Native Races of the Northern Atlantic Seaboard of America, C. S. ABBOTT, 401.—M. E. Wadsworth on the Iron Ores of the Marquette District, 402.—Jasper and Iron Ores of the Marquette Region, M. E. WADSWORTH, 403.—Saurian and Mammals of the Lowest Eocene of New Mexico: Miocene Rodents of North America and Canidæ of the Loup Fork Epoch: The Irish Elk, *Megaceros Hibernicus*, in the Ancient lake deposits of Ireland, W. WILLIAMS, 408.—Tertiary Lake Basin of Florissant, Colorado, S. H. SCUDDER, 409.—Address of the President of the Geological Society of London: Pantotheria of Marsh: Vanadates of Lead at the Castle Dome Mines in Arizona, W. P. BLAKE, 410.

Botany and Zoology.—Recent Papers on the Marine Invertebrata of the Atlantic Coast of North America, A. E. VERRILL, 411.—Manual of Practical and Normal Histology, T. M. PRUDDEN, 414.—U. S. Entomological Commission: The Hessian Fly, A. S. PACKARD: E. S. Morse on changes in Mya and Lunatia, 415.

Astronomy.—Theory of the Moon's motion, deduced from the Law of Universal Gravitation, J. N. STOCKWELL, 415.—Astronomical and Meteorological Observations made during the year 1876 at the U. S. Naval Observatory, 416.

Obituary.—Dr. G. Linnarsson, 416.

NUMBER CXXXII.

Page

ART. LIV.—On a possible cause of the Variations observed in the amount of Oxygen in the Air; by E. W. MORLEY 417

LV.—On Jolly's Hypothesis as to the Cause of the Variations in the Proportion of Oxygen in the Atmosphere; E. W. MORLEY 429

LVI.—Lower Silurian Fossils in Northern Maine; by W. W. DODGE 434

LVII.—A Contribution to Croll's Theory of Secular Climatal Changes; by W. J. MCGEE 437

LVIII.—The Stereoscope, and Vision by Optic Divergence; by W. LEC. STEVENS 443

LIX.—On the relation of the so-called "Kames" of the Connecticut River Valley to the Terrace-formation; by J. D. DANA 451

LX.—Japanese Seismology; by C. G. ROCKWOOD 468

LXI.—An Apparatus for the Distillation of Mercury in Vacuo; by A. W. WRIGHT 479

SCIENTIFIC INTELLIGENCE.

Physics and Astronomy.—Dynamo Electric Machines, W. THOMSON: Rotation of plane of Polarization of Light by the Earth's Magnetism, H. BECQUEREL: The value of the Ohm, RAYLEIGH and SCHUSTER, 484.—Ephemeris of the Satellites of Mars, H. S. PRITCHETT, 485.

Geology and Natural History.—Geological Survey of Pennsylvania, 485.—First Annual Report of the U. S. Geological Survey, C. KING: The Kames of Maine, G. H. STONE, 487.—Geology of Staten Island, N. L. BRITTON: Apuan Alps, B. LOTTI and D. ZACCAGNA, 488.—Jelly-like carbonaceous mineral resembling dopplerite, from Scranton, Penn., T. COOPER: Emeralds from Alexander County, North Carolina, W. E. HIDDEN, 489.—Brief notices of some recently described minerals, 490.—Artificial formation of the Potash-feldspar, Orthoclase, C. FRIEDEL and E. SARASIN: English Plant-names from the Tenth to the Fifteenth Century, J. EARLE, 491.—Familien Podostemaceæ, E. WARMING: Recherches sur la physiologie et la morphologie des ferments alcooliques, E. C. HANSEN, 492.—On an Organism which penetrates and excavates Siliceous Spongespicules, P. M. DUNCAN, 493.—Bulletin of the Museum of Comparative Zoology at Harvard College: The Palæocrinoidea, WACHSMUTH and SPRINGER: Cosmos les Mondes, 494.

Index to vol. xxii, 495.

ERRATA.

P. 186, 3d line from top, for "type are" read "type, are."

P. 187, 5th line from bottom, for "effected" read "affected."

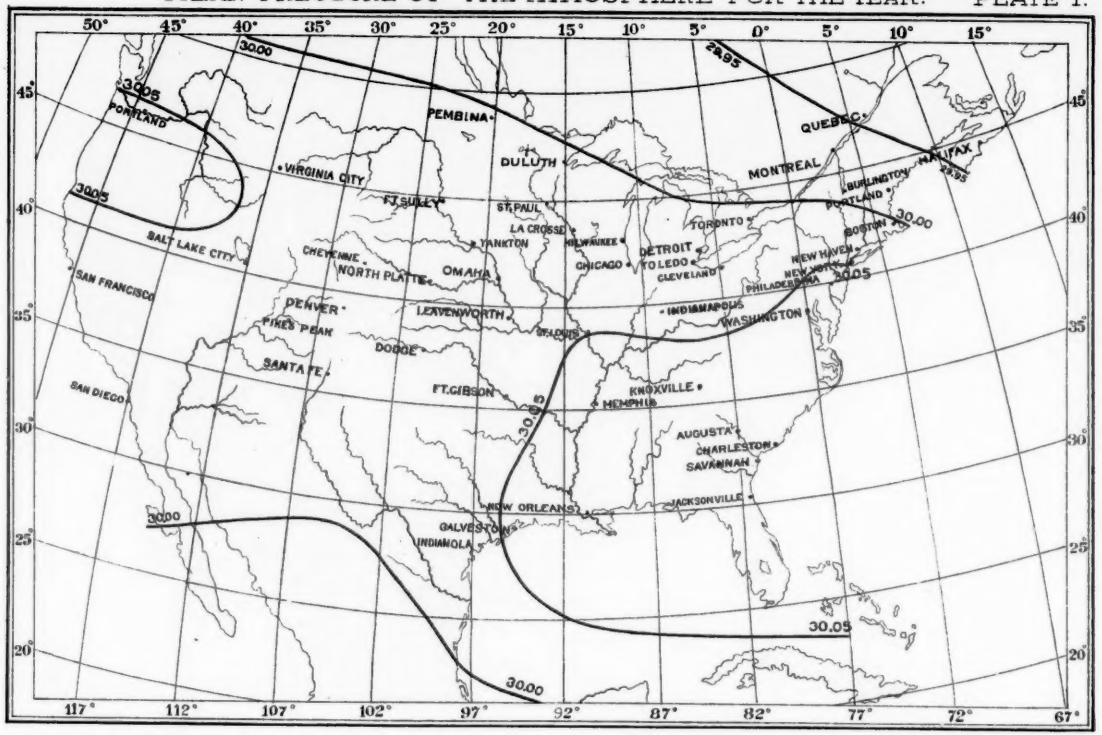
P. 188, 12th line from bottom, after "Adolph Mayer" the sentence should be continuous; thus "Adolph Mayer, I find, etc."

P. 191, 7th line from top, for "clay, permeating" read "clay, but permeating."

P. 191, for "differing so in" read "differing in."

P. 192, 11th line from top, for "proportionately" read "proportionality."

P. 240, 4th line from bottom, for Capt. W. H. Dow, read Prof. W. H. Dall.

P. 286, 19th line from bottom, for "Prototheria" read "Pantotheria."


MEAN PRESSURE OF THE ATMOSPHERE FOR THE YEAR. PLATE 1.
